

LifeOne Formula use with Chemotherapy – Radiation Therapy

You don't have to avoid chemotherapy or radiation therapy to receive benefits from natural products and LifeOne Formula. In fact, the LifeOne Formula are quite useful when used in conjunction with chemotherapy, radiation therapy and surgery. The best ones work to support the body so that radiation and chemo will actually work better. In addition, the immune system will be stronger, and better able to keep cancer from developing again.

It makes sense, doesn't it, to supplement your chemotherapy or radiation treatments with other options that support your body and actually help it be much more effective in fighting cancer.

Many people *only* do chemotherapy and radiation therapy, and do not also support their body's fight against cancer in other ways. All too often, the cancer is not destroyed, or comes back a short while later. And no wonder...

If the immune system has been wiped out by chemotherapy or radiation, cancer is bound to overrun the body even faster than before.

Seeking other options *after* the doctors throw in the towel and say there is nothing else they can do, is necessary. It makes more sense to correct the underlying causes of cancer early on when the odds are much better. Especially with natural supplements like the LifeOne Formula that can do no harm.

Natural supplements won't hurt you. They can only help. *They won't make chemotherapy or radiation therapy less effective.* Instead they amplify the power of whatever cancer treatments you may be doing by attacking cancer in other ways, or supporting the health of the body and immune system. For example, research studies have shown that when you oxygenate cancer cells, radiation therapy is more effective at killing those cells. And beta glucan, when used in conjunction with some types of chemotherapy, produced marked improvement over chemotherapy alone.

Certainly some people beat cancer using chemotherapy or radiation therapy. But look at the number of deaths from cancer, and you see that to many people don't. Not using natural supplements to fight cancer is like being in a life and death struggle, and choosing to fight with one hand tied behind your back.

The more support you give your body, the better you will be at handling any possible side effects of chemotherapy and radiation therapy, and the better your body will be at fighting cancer.

A natural approach to cancer is based on making your body *healthier*. To strengthen a depleted, worn out, under energized immune system that is not capable of killing cancer cells as fast as they are multiplying.

Use safe, natural supplements to change the body's internal environment to one that does *not* support the growth of cancer, and to directly attack and kill cancer cells.
